

SMART BUS TRACKING SYSTEM

Making Every Journey Simple & Certain! ✨

 Dasharath Arjun Bata Madhyamik Vidyalay

WHAT'S THE PLAN?

1. The Problem: Why waiting is hard

2. The Solution: Our Smart Display

3. The Tools: Arduino & TFT Magic

4. The Impact: Helping our village

5. The Future: What's next?

WHY THIS MATTERS FOR OUR VILLAGE

Save Time

No more standing for hours in the sun or rain!

Reach School

Students never miss a class or an important exam.

Save Money

No expensive smartphones or data plans needed.

Help Workers

Reach work on time and manage daily earnings better.

Simple for All

Easy to use for everyone, including our elders.

MEET OUR SMART BUS TRACKER! 🚌

Imagine a **"Talking Bus Stop"** that tells you exactly when the next bus is coming!

We use a small computer called **Arduino** to show live bus times on a bright screen.

It's like having a **city-style app**, but right on the bus stop wall for everyone to see!

ADD ILLUSTRATION OF BUS STOP WITH SCREEN

THE PROBLEM WE FOUND

CITY LIFE

-  Smart Apps (Chalo)
-  Fast 5G Internet
-  Live Bus Tracking

CITY APP SCREENSHOT

RURAL REALITY

-  Hours of Waiting
-  No Internet Signal
-  No Idea When Bus Comes

RURAL BUS STOP PHOTO

WHAT'S INSIDE THE BOX?

PHOTO OF ARDUINO UNO

Arduino UNO

The "**Brain**" that thinks and controls everything!

PHOTO OF TFT DISPLAY

TFT 3.5" Display

The "**Face**" that shows bus times to everyone.

PHOTO OF CABLES

Connector Cables

The "**Nerves**" that carry data between parts.

HOW THE MAGIC HAPPENS ✨

1. INPUT

Bus schedule data is sent to the Arduino.

2. PROCESS

The Arduino "Brain" calculates the arrival time.

3. OUTPUT

The TFT screen shows: "**Bus 101:**
5 mins away!"

FRONT VIEW OF MODEL

SIDE VIEW / CIRCUIT PHOTO

SEE IT IN ACTION!

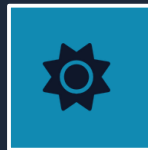

- ✓ We built a **mini model** of a real rural bus stop.
- ✓ The screen is fixed at **eye level** so everyone can read it easily.
- ✓ The Arduino "Brain" is **hidden safely** inside the structure.

WHAT'S NEXT FOR OUR PROJECT?

API Tracking

Track buses live on a map for 100% accuracy!

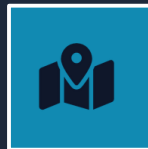

Solar Power

Use the sun to keep our screens running forever.

Mobile App

A simple app for people who have smartphones.

More Villages

Putting these smart stops in every rural area!

QUICK QUIZ!

If you saved 30 minutes every day by not waiting for the bus, what would you do with that time?

A) Play Cricket

B) Read a Story

C) Help at Home

Fun Fact: Most people in villages wait over 40 minutes for a bus!

ANY QUESTIONS? 🤔

Don't be shy, ask anything!

KEEP DREAMING!

"Every big solution starts with a small idea. Let's use technology to make our community better!"
